

OCTOBER MONTH PROJECT CLASS -I

SDG GOAL 6

CLEAN WATER AND SANITATION

In 2015, leaders from all 193 countries of the United Nations made the most ambitious plan that has ever been agreed. World leaders agreed to **17 Sustainable Development Goals (SDGs)** for a safer, cleaner and more prosperous world by 2030. We believe that by teaching kids about the Global Goals, we can make our kids global thinkers and changemakers. This month CLASS 1 has taken a project of discussing **GLOBAL GOAL 6** with our kids i.e **CLEAN WATER AND SANITATION**. Children were briefed about SDG Goals and how can they contribute in their little ways especially for SDG Goal 6.

They were shown PPT and Videos to explain the fact that **Water** is essential to life. If deprived of water, no living being can survive for long. Various factors contributing to water pollution were also discussed through videos and presentations.

An open discussion was held on the wise use of water and favourable hygiene behaviour. Children also depicted the steps for hand washing. Role plays were also done by some students to show best hygiene practices to follow. They were also encouraged to take up this project ahead and make every one in their family aware of this goal and take effective measures. The initiative was well appreciated by the parents, they too took a pledge to work on the goal of Clean Water and Sanitation.
